GOODSPRINGS DISTRICT

Over 100 cars of ore per month are being shipped from the Goodsprings district. Every property is now being worked, including the Ninety-Nine, Monte Carlo, Anchor (has 200 tons of 70 per cent lead ore), Pilgrim, Wharf, Sultan (has 10 feet of zinc ore), Hoodoo, Bonanza, Prairie Flower, Dusky Belle and Keystone. The Yellow Pine employs between 80 and 100 men. It is producing 40 per cent zinc ore. The Boss platinum mine is still finding ore in the deeper levels. The copper ore also contains platinum. —Mining Press.

GERMANS REMOVING TO SCANDINAVIAN COUNTRIES

(By Associated Press.)

CHRISTIANA, Norway, June 10.—The explanation that German authorities have urged rich and well-to-do German citizens to take up a residence temporarily in a neutral country, so as to make conditions less hard-pressed for those who remain in Germany, has been advanced here in connection with the fact that a large number of Germans have come to Norway to live for the time being. There are also increased numbers of Germans going to the other Scandinavian countries.

AGE CANNOT PALSIFY THIS ARTIST'S HAND

(By Associated Press.)

LONDON, June 10.—One of the exhibitors in the Royal Academy exhibition this year is James Sant, an honorary retired academician, who was born in 1820. His record of painting pictures for exhibition at the age of 95 is only equalled by that of Titian, who is said to have continued work with his brush nearly up to the time of his death at 99.

TEMPERATURE REPORT

Highest temperature yesterday, 82; a year ago, 71.
Lowest temperature last night, 55; a year ago, 51.

FRANK M. CHAPMAN, representing the John Wieland and Fredericksburg breweries, is in town mingling with his customers.

AUSTRIAN OFFICERS DISPLAY GALLANTRY

REGIMENTAL COLORS SAVED BY LOYAL DEFENDERS OF PRZEMYSL

(By Associated Press.)

PETROGRAD, June 10.—A Kiev newspaper publishes the following account of the Austrian officers' attempt to save the colors of the fortress of Przemyśl:

"At the surrender of Przemyśl the standard of the fortress and the colors of regiments constituting its garrison disappeared. A few days ago a party of captured officers, with General Tomashy at their head, was quartered at Kiev. As the result of information received, the prisoners were searched. In General Tomashy's handbag was discovered, complete and in perfect condition, the standard of the fortress of Przemyśl. A further search disclosed long colored stripes of material hidden away in the lining of the officers' headaddresses. These stripes proved to be parts of the regimental colors.

"It appears that on the eve of surrender of the fortress all the regimental colors were cut up into strips, numbered, and then handed over to the officers of the garrison. These officers, on return from captivity, were to give back to the authorities the pieces of colors entrusted to them, so that it would be possible to remake the colors and in this manner give the regiments concerned the right of further existence."

TONOPAH'S MINING OUTLOOK ROSEATE

(Continued from Page 1.)

opment company is also growing more acquisitive is evidenced by its application for and receipt of an extension of its option on the Surf Inlet property in British Columbia. The company will have until January 1, 1916, to exercise its right of option, which was given on 80 per cent of the property. In the meanwhile prospecting work will be steadily prosecuted. It is evident that the Tonopah Mining company of Nevada utilized rare judgment in acquiring both the Nearagun and Colorado subsidiaries. Mr. Charles sends most favorable reports of the former, while the latter is now shipping bullion at the rate of \$1000 a day, with the Breckenridge dredgers not yet in full operation.

Tendency Toward Merging.
There are several groups of mining properties in the district that are very friendly toward each other, which may or may not in time result in the forming of mergers, but even if they continue separate existence there will be a spirit of co-operation that will be of great mutual benefit. Undoubtedly the consolidation of Tonopah Extension, Merger and Victor, ratified on the 9th, will prove of great benefit to the district and to the ultimate profit of the shareholders in all of the companies, as intercompany litigation is now an impossibility, while there will be a more uniform and thorough development of the properties.

As the year ages the output of bullion not merely holds its own in the face of a languid silver market, but almost imperceptibly though steadily grows, the high water mark for 1915 thus far being the production for the last week in May, with evidence that the third week in June will touch the quarter million mark.

Mines in Healthy Condition.
Briefly summarized, the mines of Tonopah are in most healthy and promising physical condition at the present time. North Star, the property producing the highest grade bullion in the district, is now on a paying basis. There are many difficulties in operation faced by the management, but the returns from the mill are in excess of the expenses incurred, while very promising virgin ground is being prospected.

Cash Boy has at last entered the list of shippers, making a very modest debut, but promising to occupy a more important position later. The faith that is in the management has induced it to spend a considerable amount of money secured from the recent assessment in the purchase of new equipment and going after the ore at greater depth.

Finding Ore Simple Matter.
Tonopah Bonanza will continue down until the drum is too small for the cable, when there will be a shut-down for a day or two and a larger drum, already on the ground, will be substituted. "It is a very simple matter to get the ore in the west end of the district," says Superintendent Haskell. "All that is necessary is to keep on, like a chambered nautilus, buying larger and larger drums. Finally you will get one that you can make a noise on."

Umatilla is one of Herman Zadig's pets. Mr. Zadig was once a devotee to the calyx drills. He used them on the Brunswick lode at Virginia City until he made it look like a sieve. Now he is installing a diamond drill on the Umatilla. Until such time as he locates an ore body there will be no further sinking or crosscutting.

Tonopah East End is about to resume sinking. Water occasioned considerable trouble when the sickenside formation was reached. Besides, the old hoisting plant was no longer adequate. The new hoist will be electrically propelled.

The Rescue-Eula is, according to close observers, on the eve of important developments. An unexpected seam on the 550 level has developed into somewhat of a vein of medium

grade ore. There are two veins ahead of the drills, veins that looked promising on the level above. They will probably be cut within the next few days.

A Whale of a Vein

Tonopah Extension, pronounced by experts to be one of the greatest silver mines in the world, has augmented its wealth by proving up the Murray vein on the 1350 level of the new shaft. The management has not yet determined the thickness of the vein, but is hurriedly advancing drifts both east and west. The ore is all of excellent milling value. The output from the Extension mill, to which filtering and crushing additions have been made so that increase in the number of stamps will be the next logical step, is growing, even with a desire to keep down the heads until such time as silver revives.

West End is also feeling the need of enlarged treatment equipment as this property could easily busy all its stamps, while at the same time it is looked to for assistance by properties in the district that have no mill equipment of their own. Should the West End renew its attack upon the West End-McNamara vein, it would quickly overtax the mill, as other portions of the mine are showing huge reserves of ore.

Jim Butler is making his principal production through the Wandering Boy shaft, where ore is showing on four levels, although the Desert Queen shaft is used for extracting from a four-foot vein in Stone Cabin, with other openings in ore.

Favorite Vein Well Named

Tonopah Belmont aptly named one of its veins the Favorite. With the exception of a tendency of that lode to fault occasionally, it is an old faithful. While the Belmont is producing ore in more than thirty places, the Favorite is its principal treasure house. The Belmont continues to hold first place in the camp in tonnage extracted and bullion produced.

Victor is also producing, but it is still water and at the rate of better than half a million gallons daily. It will probably require three more weeks to thoroughly unwater this property. Victor, in addition to its favorable ore showings before the deluge, is the safety valve for the western portion of the district. If it were not for the pumping operations there more than one of its neighbors would be almost hopelessly flooded.

Tonopah Mining is breaking from 250 to 300 feet of new ground weekly and is pursuing operations in the Sand Grass, Silver Top, Red Plume and Mizpah, with an average production of 3000 tons of ore weekly.

Halifax is producing spasmodically and developing thoroughly. Its main difficulty lately has been the faulting of its principal vein, a huge lode that has been subjected to violent action. This property is being worked on the 12th, 14th and 17th levels. Ore shows in each of these workings.

Buckeye Belmont is running along the Halifax line easterly from a crosscut north of the shaft. It is the expectation that a continuation of the Halifax ore body will be found in the trachyte that traverses this property. Midway Consolidated is one of the busiest estates in the camp. There are 85 leasers at work in the old ground above the 500 level and they are making good. A number of shipments have been made and other tributaries are ready to hoist. The Midway is installing a heavy plant of machinery over the new shaft and in a few days will resume work on company account.

Gypsy Queen with one shift is deepening its shaft at the rate of about two feet a day.

McNamara mill is handling the sweeps from the mill ponds of the district at the rate of 15 tons daily.

E. F. DOHERTY and wife arrived from San Francisco Monday morning. Mr. Doherty is employed in the local Western Union telegraph office as operator, having been transferred from the San Francisco main office. He is taking Mr. Brazelton's place, who left for San Francisco.

When a farmer has nothing much to do and intends to spend the day journeying in the White House these times of international stress, Birmingham Ledger.

AMUSEMENTS

BUTLER THEATER

Tonight at the Butler Lezette and Hedges, the versatile vaudeville team which has been entertaining large audiences throughout the week, will again be heard in a new selection of the latest songs which they put on in a manner that is very pleasing, their repertoire seeming to be unlimited. They are the best in their line that has ever appeared in Tonopah and the theater-going public is certainly enjoying the opportunity of seeing and hearing these high-class artists. The picture program consists of a Charles Chaplin comedy entitled "By the Sea," which is sure to drive the glooms away, and a three-reel Kalem feature, "The Second Commandment," a story of Christian Science, and an unusually strong attraction, Miss Dorothy Bernard, who last season scored a smashing success on Broadway, is the actress playing the leading role. The story, produced by Kalem, is one of a series of three-act dramas, each of which shows the modern application of one of the ten commandments. Goy Combs and an all-star cast of Kalem players appear with Miss Bernard in this story.

Tomorrow another Paramount feature—Max Fagan in "What's His Name." On Saturday, Dare-Devil Art Smith, the human comet, will be seen looping the loop in his aeroplane at midnight, defying death. On Saturday afternoon only, a two-reel children's picture, "Mr. Santa Claus," will be added to the regular program.

Good music by the orchestra both afternoon and night and a cool and comfortable house, the air being changed every four minutes.—Adv.

PASTIME THEATER

Staging battle scenes is among the best accomplishments of the able staff of directors working at the Hollywood plant under the general supervision of D. W. Griffith. This was never better shown than in the warfare picture in "Captain Macklin," the four-part Mutual masterpiece from the pen of Richard Harding Davis, who knows warfare and its vicissitudes if any writer does. The scene where young Royal Macklin, when his troops fall him in a charge, single handed and alone rushes forward and captures a trench thrills the audience as nothing in moving pictures has recently done. "Captain Macklin" will be shown at the Pastime today only.

Lillian Gish, particularly widely known at this writing for her impersonation of the part of Elsie Stoneman in D. W. Griffith's great production, "The Birth of a Nation," has the part of Beatrice and lends to it all that charm and grace of characterization that have won for her a host of followers.

Tomorrow another Mutual masterpiece, "Rumpelstiltskin." Remember the big prizes to be given to patrons tomorrow evening.—Adv.

NEW TODAY

PERSONAL

JUDGE SNYDER left for his home in Salt Lake this morning.

MRS. M. H. CRISLER returned to Carson City this morning.

JACK SALSABURY and T. K. MUIK motored over from Manhattan this morning.

WILLIAM VEITH arrived from the coast this morning and will continue on to Manhattan.

H. H. ATKINSON returned today from Reno where he attended the grand lodge of Masons.

GENERAL MANAGER CHANDLER of the West End is expected back from the coast tomorrow.

HARRY STIMLER, one of the discoverers of the southern mineral districts, is in from Belmont, where he is developing a gold and silver property. J. J. GRIFFIN, manager of the Jack Salsbury interests at Manhattan, returned with him from the Pine Tree camp this morning. Mr. Salsbury continued on to San Francisco.

HORACE C. BAKER, editor of the Copper, Curb and Mining Outlook, returned this morning to New York City after a hurried visit to the camp, the second this year. He expects to return later in the season for a more extended stay.

ED MALLEY, state treasurer, accompanied by his son George, arrived from Carson City this morning. George came to visit his brother Ed, who found the state capital too slow a place for permanent residence.

MAYNARD JONES, former engineer at the Umatilla, who had been confined in the mine operators' hospital the past three weeks with pneumonia, has so far recovered that he was able to leave for Reno this morning. He was accompanied by his sister, Mrs. Cathar, for California.

MRS. HENRY STEVENS, after a residence in Tonopah of fourteen years, has disposed of her real estate here and departed for Reno yesterday, where she will reside in the future. Mrs. Stevens has many friends who will regret her departure. There were a number of people at the depot to bid her farewell.

If you owe Ed Wheeece pay A. H. Smith to avoid cost.—Advtf.
